Optional COVID-19 Antigen testing

- Nurse Kim will be the authorized registered healthcare professional to administer Covid-19 testing to staff and students for Oran R-III Schools.
- Minimally invasive procedure, collected via nasal swab. Test takes approximately 15 minutes and will isolate as soon as possible if needed.
- There is no cost for this test.
- Parent/Guardian must be present for consent of students' first test.
- **Students and staff** can make an appointment for testing to keep our nurses office from getting chaotic.   The only exception to this is if we have a student/staff member that develops symptoms during school hours, they would then be tested immediately to minimize quarantines for others and remove any positive case from campus as soon as possible.
- Anyone receiving a covid test will be asked to park in the elementary visitor parking space. **PLEASE DO NOT COME IN THE BUILDING.** Call 573-262-3435 Ext. 1 and ask for Nurse Kim when you arrive.
- As required, negative and positive results will be submitted to the Department of Health and Senior Services.
- Used tests will be discarded in a biohazard container and picked up by a medical waste provider.
